Dr. David Carroll

Plenary Speaker:

Dr. Carroll oversees the operations of the VHA mental health system ensuring Veterans have access to crisis intervention and suicide prevention services and on-going access to high quality mental health care. He is committed to improving the health and well-being of Veterans by coordinating services across VA and with community partners, reducing variability, sharing best practices, and developing leaders within mental health. Additional duties include:

- Leading measurement-based management, measurement-based care, and action planning through the use of shared dashboards with leading indicators and routine calls with network and facility leadership
- Directing multiple work units and teams in support of suicide prevention and the VHA mental health care system
- Building alliances with field leadership and VHA program offices and with Veteran Service Organizations and service groups, professional associations, and community partners
- Pursuing innovation through the application of new technologies and through expansion of service delivery practices, including the expanded use of Telemental Health, to improve access to care and Veteran experience
